

Huntr/x Quest: Agwi Hwasin Phase Guide

This is a guide for Agwi Hwasin's combat in Quest 11: Takedown. This is for Gwi-Ma's eyes only: heroes should close this book!

General Behavior and Gwi-Ma Advice

Agwi Hwasin does not behave like a normal enemy. He frequently does not move at all, and only executes special abilities: abilities that, by and large, do not do anything useful until the next turn. Fighting Agwi Hwasin becomes a challenge of learning and anticipating what he *could* do to you, and finding room in-between his attacks to open up attacks of your own.

For less adversarial campaigns, this guide provides scripted advice for who to target and what attack to use in each of his phases. For a more advanced or adversarial boss, you may ignore that advice and choose your own targets and which ability or abilities will be used. But do so only while understanding the risks to the fairness of the quest.

Ability List

These are the list of abilities that will be referred to in the various phases. Note that Agwi himself cannot take any damage from his own abilities..

- **Summon Chaos Warriors:** *The demon lord's eyes narrow, and he raises a single finger to the sky. A bolt of blue light surges from it into the infinite abyss, and then splits and descends next to each hero, turning into a chaos warrior as it lands.*

Summon a Chaos warrior directly adjacent to each hero. They cannot attack or move during the current Gwi-Ma turn.

If ignoring Agwi turn order recommendations, you cannot perform this ability more than once every 3 rounds.

- **Gamma ray:** *The lord of Malice clenches his teeth in anger, and then stretches out his arms, palms-outward, at you. A ray of terrible pulsing light emits from his hands towards your direction, beginning to burn the tips of your hair as its power charges up.*

An overlay three rows wide, starting from Agwi and with destination centered on target (but likely will project behind them or even off of the board)

At the start of Agwi's next turn, anyone occupying a square that is overlapped at all by the gamma ray takes 3 automatic + 2 attack dice hits, and can defend as normal. When the attack is finished, remove the Gamma Ray overlay from the board. (*Suddenly the pulsing light glows white hot for an instant, briefly lighting the entire night sky with its surge of power before dissipating*)

- **Meteor Strike, Small:** *The demon makes a fist, swinging it downwards in an arc. You see the silhouette of something massive far above coming directly at you, and look up in time to see a ball of stone and flame descending from the heavens.*

Place the 3 x 3 Meteor Strike overlay on the board centered under the target.

At the start of Agwi's next turn, anyone occupying these squares take 2 automatic + 5 attack dice hits, and can defend as normal. When the attack is finished, remove the Meteor Strike overlay from the board. (*The meteor slams into the ground with a mighty thunder.*)

- **Meteor Strike, Large:** *The demon makes a fist, swinging it downwards in an arc. You see the silhouette of something massive far above coming directly at you, and look up in time to see a sizable form of stone and flame descending from the heavens.*

Place the 5 x 5 Meteor Strike overlay on the board centered under the target.

At the start of Agwi's next turn, anyone occupying these squares take 2 automatic + 5 attack dice hits, and can defend as normal. When the attack is finished, remove the Meteor Strike overlay from the board. (*The meteor slams into the ground with a mighty thunder.*)

- **Wall of Malice:** *Agwi Hwasin gestures dismissively, and crimson rays - faint at first, but steadily growing in energy - pour across the rooftops in many directions.*

Full board length vertical/horizontal wall overlays placed in fixed letter positions on the map's quest guide. If the letter is at the top of the map, it will activate vertically from that position downwards. If the letter is along the left of the map, it will activate horizontally from that position to the right.

They activate at the start of Agwi's next turn, and anyone standing on/in them take 2 automatic + 2 attack dice hits, and can defend as normal. When the attack is finished, remove the Wall of Malice overlays from the board. (*The crimson rays pulse with a tremendous surge of violence, and then vanish.*)

- **Heat Ground:** *Agwi Hwasin points an extended hand towards your feet. The ground on the current platform begins to glow bright red, and you can feel the heat build even through your shoes.*

Place 3 skull tokens next to the platform. At the start of each of Agwi's turns, remove a skull token and deal 1 unblockable damage to any unit standing on the platform. When there are no skull tokens left, the platform cools.

If ignoring Agwi turn order recommendations, no more than one of these can be active at a time: activating a new one immediately ends the old one.

Phase 1

In this phase, Agwi Hwasin is floating on the other side of the map. Hunters will have to learn and dodge his attacks - or rely on ranged attacks - to take him down. This phase provides a good opportunity for the heroes to learn the full gambit of his attacks, so that when they are combined in more deadly ways in subsequent phases they can expect what's coming - as well as the consequences for not evading those attacks.

If ignoring Turn recommendations, you can perform 1 ability per turn during this phase.

Stats

Defense Dice: 4

Body Points: 10

Mind Points: 12

Special: Damage Limit (2) ("You feel like some powerful force slowed the speed of your weapon moments before impact.")

Turns

1. Summon Chaos Warriors
2. Meteor Strike Small, target lowest body point hero
3. Gamma Ray, target highest body point hero
4. Heat Ground, target closest hero
Wall of Malice, Letter B
Wall of Malice, Letter C
5. Meteor Strike Small, target closest hero
Meteor Strike Small, target highest body point hero not already targeted
6. Wall of Malice, Letter D
Wall of Malice, Letter E

Repeat from Turn 1 until Agwi reaches 0 body points.

Phase 2

In this phase, Agwi will teleport to a new position and will begin combining his attacks more frequently, and in new combinations. He no longer has the damage limit shield. He now has a Damage Minimum shield.

If ignoring Turn recommendations, you can perform 2 abilities per turn during this phase.

Stats

Defense Dice: 4

Body Points: 15

Mind Points: 12

Special: Damage Minimum (2) ("Agwi seems to shrug off your insufficiently potent attack.")

Turns

1. Meteor Strike Large, target closest hero
Gamma Ray, target highest body point hero not already targeted
2. Gamma Ray, target highest body point hero
Wall of Malice, Letter B
Wall of Malice, Letter D
3. Wall of Malice, Letter C
Wall of Malice, Letter E
4. Meteor Strike Large, target closest hero
Summon Chaos Warriors
Wall of Malice, Letter E
5. Heat Ground, target closest hero
Gamma Ray, target closest hero
Wall of Malice, Letter C

Repeat from Turn 1 until Agwi reaches 0 body points.

Phase 3

In this phase, Agwi's defenses are lowered but he's going to give it everything he's got.

If ignoring Turn recommendations, you can perform 3 abilities per turn during this phase.

Stats

Defense Dice: 4

Body Points: 77

Mind Points: 12

Turns

1. Summon Chaos Warriors
Heat Ground, target closest hero
Meteor Strike Large, target highest body point hero not already targeted
2. Meteor Strike Large, target closest hero
Meteor Strike Large, target highest body point hero not already targeted
Wall of Malice, Letter B
Wall of Malice, Letter C
3. Wall of Malice, Letter B
Wall of Malice, Letter C
Wall of Malice, Letter D
Wall of Malice, Letter E
4. Gamma Ray, target closest player
Gamma Ray, target furthest player
Meteor Strike Large, target self (so it hits units directly adjacent if they stay there)
Wall of Malice, Letter D
Wall of Malice, Letter E
5. Gamma Ray, target Rumi
Meteor Strike Large, target Zoey
Meteor Strike Large, target Mira
Wall of Malice, Letter B
Wall of Malice, Letter E

Repeat from Turn 1 until Agwi reaches 0 body points.
